Process**Force**

Building on SAP Business One's powerful capabilities for key business functions CompuTec ProcessForce focuses on the areas that matter most to advanced manufacturers. It adds scores of functionalities for inventory management, product data, production process management, quality control and complaint management as well as enhancing SAP Business One's existing features in cost accounting, reporting and workflow management and more.

Product Data Management
- Define ingredients, nutrients, allergens and pack/serving sizes
- Assign classifications, properties and phrases

Bill of Materials
- Phantom and multi-level product structures
- Co-product, by-product, WIP items and scrap management
- Multiple simultaneous Bill of Material variants
- Mass replace function

Product Routings
- Allocate resources, tooling and labor
- Set timings for each stage of production
- Material consumption for all operations
- Define alternative routings and manage advanced relations

Manufacturing Orders
- Order dependent recipes and routings
- Backwards and forwards scheduling
- Wide-range of document creation options
- Manage warehouse movements
- Control document workflow and progress

Full Batch Control and Traceability
- Batch consumption control and serial number management
- Shelf-life management
- Batch genealogy tree
- Recall and audit reports
- Transaction and document traceability
- Batch items distribution

Quality Control
- End-to-end quality management
- Define testing rules and procedures
- Customizable test result management and system alerts
- Delivery vehicle inspection
- Integrated compliance management

Ingredient Declaration
- Templates for quick data entry
- Categorize and classify ingredients and manage allergens
- Alternative code - define common, scientific or Codex Alimentarius INS or EAU numbers
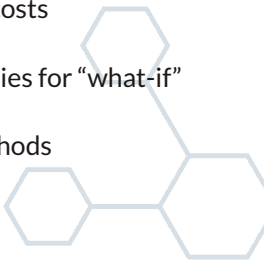

Product Costing
- Customizable in-depth multi-level costing
- Fixed and variable overhead costs management
- Manage multiple cost categories for "what-if" simulations and analysis
- Variety of cost allocation methods
- Production costing analysis – planned vs. actual

Complaint Management
- Track returns
- Manage the entire lifecycle of complaints
- Record complaint type, code and action taken
- Execute product recalls efficiently

KEY BENEFITS

Supply chain data management

Expanded product information

Manage even the most complex recipes and the most precise processes

Plan and analyze the whole production process

Complete audit trail

Comprehensive analytics and forecasting tools

Optimize operations and increase customer satisfaction
Plan your enterprise's growth

#CompuTec

WMS

Warehouse Management Solution

Optimize your warehouse management practices no matter how many, how large or how complex your warehouses are.

- **Organize and control logistics processes**
- **System support for all logistics documents**
- **Wide scope for supporting the production process**
- **Batch and serial numbers support**
- **Handling and storage unit management**
- **Stock counting**
- **Customizable interface**
- **User defined fields**
- **Design and manage task queues and workflow**
- **Full weight scales integration**
- **Data input via GS1 barcodes and touchscreen handheld devices**

#CompuTec
PDC

Plant Data Capture

Supervise your machine park, control your production resources and track production flow in real-time all from your production line.

- **Support the manufacturing process via production panels**
- **Manage production tasks and resources**
- **Control inventory movements during the production process**
- **Extensive manufacturing order data management options**
- **Record manufacturing order times**
- **Monitor resource status**
- **Control and register downtime**
- **Assign employees to specific scheduled tasks**
- **Customize the visible interface for each individual user**

KEY BENEFITS

On-the-spot data access

Live progress monitoring

Multiple simultaneous work time registrations

#CompuTec
Labels

Label Printing Management

Manage all your printing templates and label printers from one location and make sure your products are labelled exactly the way you want them to be.

- **Print from multiple databases**
- **Extensive configuration options**
- **Support for Crystal Reports and native printer languages**
- **Print directly from non-standard documents e.g. Master Data**
- **Manage printing rules**
- **Preview and print sample labels**
- **Email reporting**

Powered by CompuTec solutions

Now, when we take data from our system, we can actually rely on it.
James Obeng, Chief Operating Officer, HPW Fresh & Dry Ltd., Ghana

Our business processes are a lot more autonomous, month end is processed easily and accurately, we have better clarity with what is happening in the business and we can track our inventory with more precision.
Bob Zhou, Systems Manager, Australian Dairy Park, Australia

My intention is to use a KISS system (Keep it Simple, Stupid) not some convoluted system that nobody can use. CompuTec can help us to make it KISS for the team on the factory floor. No thinking, no decision-making and no confusion. Simply press a button and the system tells you what to do.
Herman Jeurissen, ICT Manager, Conveni, The Netherlands

In order to ensure compliance with industry regulations and standards, our inventory needs to be fully traceable at any given moment and the bigger we get, the more complex that becomes. CompuTec ProcessForce and WMS have taken the hassle out of that whole process and eliminated that particular barrier to our company's growth.
Jaymie Crook, President, Bosco and Roxy's, Canada

Our industry, its regulators and our customers have very high standards meaning we have incredibly particular specialized requirements. Thankfully, the CompuTec team were really flexible with us. We were truly impressed with their ability to customize their CompuTec WMS product precisely as we asked them to so that we could continue doing business in the way that we know works for us.
Laurent Courtet, IT Manager, Euralis, France, Canada and China

As we started to explore the available solutions, it became apparent that ProcessForce was, and still is, the only solution on the market that offers the detailed functionalities required by the food and beverage industry whilst being both a solution that is native to SAP Business One and easy to implement and use.
Lindsay Pointon, CEO of Signum Solutions, CompuTec partner in The United Kingdom

The Italian market was just waiting for a solution like ProcessForce to come along. We did take a number of other solutions into account but we found ProcessForce fitted perfectly into the space in the market in the manufacturing industries that are most important to us (i.e. food and beverage, chemicals and pharmaceuticals) and that there was nothing else quite like it available. We firmly believe that it is the most suited solution to advanced manufacturers that is in existence today.
Mario Barone, Run Time Solutions, CompuTec partner in Italy

ProcessForce is a seriously rich solution. You can find just about any functionality you can think of for manufacturing in it. The incredibly useful scheduling module, extensive quality control management features and improved structure for the production process are all highly praised by our customers but equally important is CompuTec's product innovation. They follow all the latest developments in SAP very, very closely. Whenever SAP Business One takes a step forward, we are secure in the knowledge that CompuTec will produce the right solution for these advances within a very short time frame. This really instills confidence in our customers that they are buying a product that will serve them well into the future.
Halim Mahdi, Innov Business Services, CompuTec partner in France & Tunisia
