

PiP chemicals

# PiP Chemicals Case Study

Partnering for digital transformation success

## At a glance

PIP Chemicals, implemented SAP Business One to take control of their stock and bill of materials. Working with chemicals involves many complex processes, but with Signum by their side PIP Chemicals feel in control.

## Who are PiP Chemicals?

PIP Chemicals is the UK's leading manufacturer of products for detailing valeting and industrial usage. While PIP Chemicals has enjoyed much success, there were several key weaknesses holding the business back.

**100+**

Products offered

**3X**

Business Growth since implementing

## CHALLENGES

PIP Chemicals previous software relied heavily on spreadsheets and could not handle stock complexity. The manufacturing side of business was being neglected. New software was required that would provide accurate stock control and automated bill of materials.

## SOLUTIONS

SAP Business One provided PIP Chemicals with a fully integrated solution that achieved everything they required.

**Always accessible**

**Greater visibility into all areas**

**Complete Financial Control**

## BENEFITS

1

### Manufacturing Excellence

Manufacturing orders put out to operatives are fully traced, from the receiving of goods to quality control and sign off.

2

### Confidence with Inventory

PIP now has clear and accessible information for all of their stock locations and inventory levels, making their whole distribution process even easier.

3

### Next Level Reports for Business

SAP Business One can generate expert detailed reports, combined with business intelligence, to provide deep and insightful reports to be used across the business.
