PolyGlobal Case Study

At a glance

PolyGlobal have reduced error, removed data entry bottlenecks, simplified entire business processes and reduced the time taken to do things. In essence, staff have more time to focus on their day-to-day interactions with the market and brand.

Who are PolyGlobal?

PolyGlobal is a market leading engineering solutions provider, specialising in injection and cast mouldings. Today, the business supplies over 250 customers around the globe.

250+
Global customers

30+
Years in business

CHALLENGES

PolyGlobal were operating a bespoke system that didn't provide any reporting functions and was limited in the information that it stored. They needed a scalable, integrated solution that could grow with the business, offer accurate insight into all areas and provide easy access to real time information.

SOLUTIONS

SAP Business One hosted in the cloud was perfect for PolyGlobal and their business goals.

Always accessible

Greater visibility into all areas

Complete Financial Control

BENEFITS

1 **Manufacturing Excellence**
Manufacturing orders put out to operatives are fully traced, from the receiving of goods to quality control and sign off.

2 **Confidence with Inventory**
PolyGlobal now has clear and accessible information for all of their stock locations and inventory levels, making their whole distribution process even easier.

3 **Next Level Reports for Business**
SAP Business One can generate expert detailed reports, combined with business intelligence, to provide deep and insightful reports to be used across the business.
